PROFESSIONAL SUMMARY

M.Sc. Statistics graduate with experience developing Python applications, SQL-backed systems, REST APIs, and data-driven dashboards. Analytical background with experience in financial-data analysis, CSV data ingestion, database-backed workflows, and Azure VM-based application deployment. Seeking to apply these skills to data engineering and cloud data platforms.

EDUCATION

M.Sc. Statistics — MIT World Peace University, Pune | CGPA: 8.02 *2024 – 2026*

B.Sc. Statistics — B.P.H.E. Society's Ahmednagar College | CGPA: 8.45 *2021 – 2024*

TECHNICAL SKILLS

Programming: Python, SQL, JavaScript, R
Data & Analytics: Pandas, NumPy, data analysis, data visualisation, CSV data ingestion
Databases & APIs: PostgreSQL, SQLite, Django REST Framework, REST APIs
Cloud & Engineering: Microsoft Azure Virtual Machines (VM creation, configuration, deployment), Docker, Git, CI/CD
Frameworks: Django, React, Flask

EXPERIENCE

Quantbots.co — Full Stack Developer | Remote *Apr 2026 – Jun 2026*

- Built and delivered 4+ business applications using Python, Django, React, REST APIs, and SQL.
- Developed 4 interactive dashboards connecting frontend interfaces with APIs and database-backed workflows.
- Implemented authentication, database models, and business logic across multiple application modules.
- Contributed to testing, debugging, Git workflows, Docker, CI/CD, and cloud deployment.

Bizmetric — Full Stack Developer Intern | Pune *Jan 2026 – Mar 2026*

- Built 3 applications across trading, financial analysis, and business workflows using Python, Django, React, REST APIs, and SQL.
- Developed dashboards and workflows integrating frontend interfaces with backend services; built a BTC/USD analysis application using market-data APIs.
- Created and configured a Microsoft Azure Virtual Machine and deployed a project in a cloud-hosted environment.

PROJECTS

PivotPulse — Stock Screening & Market Analytics Prototype | *Python, Pandas, Streamlit*

- Developing a stock-screening and market-analytics prototype using Python-based data processing and analytical workflows.
- Implementing Volatility Contraction Pattern (VCP) analysis to evaluate potential stock setups based on price and volatility behaviour.
- Building screening workflows to filter watchlists, analyse stock data, and identify potential candidates for further review.
- Structuring the scanner to support watchlists of approximately 50–200 stocks.

ERP — Multi-Business Management System | *React, Django REST Framework, PostgreSQL*

- Built a multi-business ERP platform spanning six core modules: inventory, sales, customers, suppliers, finance, and dashboards/reports.
- Developed database-backed business workflows and REST APIs using Django REST Framework, PostgreSQL, and React.
- Implemented JWT authentication, protected routes, token handling, and inventory tracking for both bag-based and kilogram-based stock.
- Deployed the React frontend on Vercel and the Django backend on Render, configuring production cross-origin access settings.

QuantMachine — Trading & Portfolio Management Platform | *Python, Django, React, SQL*

- Built portfolio-management workflows supporting personal and challenge portfolios, trade management, and portfolio analytics.
- Developed and integrated six trading strategies; the Fibonacci strategy recorded a 62% historical backtesting win rate.
- Implemented CSV-based trade-data ingestion and database-backed workflows for storing and managing financial records.
- Developed Django REST APIs and React frontend workflows for trader profiles, portfolios, and trading challenges.
